

O CEFAP - USP convida para a palestra:

**Innovative technologies to streamline workflows in biomedical research:
recombinant proteins and antibody production, cell-based assays, cell growth
and viability monitoring**

Dr. Mark R. Truesdale

Head of Marketing and Product Management at Molecular Devices

**01 de junho de 2012, 12:10h
Anfiteatro Azul – ICB 4 – USP**

Será oferecido coffee-break após a palestra

Mark Truesdale has a Bsc in Biochemistry and a PhD in Molecular Genetics from the University of London. He then completed PD positions at the University of York, UK, followed by the University of Sussex, UK. Both of these research positions studied the molecular genetics of plant stress responses. Since 1999 he has held a number of positions within Genetix, and is now head of Marketing and Product Management. In 2011 Genetix became part of Molecular Devices
